

Case Study

The objective is to convert the given sample HTML view into React architecture componentized view.

- ✓ Develop a React componentized view for the given design view
- ✓ Break a new component wherever you find it necessary
- ✓ Create a JSON mock data file wherever you find it necessary to make it dynamic
- ✓ All the styles, images, resources are available in the case study folder provided
- ✓ Use of lifecycle methods and clean code is much appreciated
- ✓ The task is to be finished in the provided time, no excess time will be allowed

All The Best !
